

TECHNICAL DATA SHEET

CORGRIP*
AVANOS* CORGRIP* NG / NI Feeding Tube Retention System

PRODUCT DESCRIPTION

This AVANOS* CORGRIP* Nasogastric/Nasointestinal (NG/NI) Tube Retention System is an accessory to prevent unwanted displacement or removal of NG/NI tubes for adult patients.
Warning: Not for paediatric use

FEATURES

- Easy to use SSL* (Slot-Slide-Lock) Clamp with French size Indication
- Centimetre markings on both catheters for safe insertion
- Biocompatible, long lasting polyester umbilical tape
- Recommended for up to 4 weeks continuous use

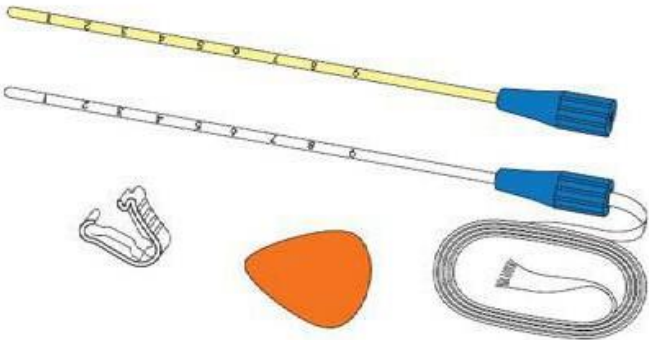

INDICATIONS FOR USE

The AVANOS* CORGRIP* Nasogastric/Nasointestinal (NG/NI) Feeding Tube Retention System is indicated for use with AVANOS* enteral feeding tubes of 8 FR and greater to prevent inadvertent removal or displacement of the tubes for adult patients.

CONTRAINDICATIONS FOR USE

The CORGRIP* is contraindicated for patients with facial and/or cranial fractures, nasal airway abnormalities or obstructions. It should also not be used on patients that may pull on the feeding tube or the AVANOS* CORGRIP* NG/NI Feeding Tube Retention

System to such an extent as to cause serious self-injury. Should a patient be likely, based on condition or mental status, to continuously pull on the feeding tube or CORGRIP*, it is recommended to secure the feeding tube via alternate means to minimize potential injury
